SUMMARY

Web Developer with 7+ years of experience building scalable web apps and multi-tenant SaaS platforms. Skilled in Laravel/PHP, React/Next.js, TypeScript, PostgreSQL, Redis, and Tailwind CSS, with strong focus on clean UI, performance, and maintainable code.

Experienced in Stripe subscriptions, REST APIs, RBAC, queues/webhooks, and CI/CD using Docker and GitHub Actions. Also uses AI-assisted coding tools like Claude by Anthropic to speed up development, improve workflows, and deliver high-quality products faster.

WORK EXPERIENCE

Web app developer, Innovify

Mar, 2024, January, 2026

- Architected and launched a multi-tenant SaaS application using Laravel, Postgress, Redis, SCSS, Javascript, react and typescript delivering a responsive, component-driven UI and scalable, secure back end.
- Implemented subscription billing (Stripe), invoicing, and role-based access control; streamlined onboarding and improved feature adoption. - Designed RESTful APIs and webhooks; leveraged queues (Horizon) for background jobs and notifications to boost reliability and throughput.
- Optimized performance with caching, eager loading, and indexing, reducing p95 response time by ~40% and lowering infrastructure costs.
- Wrote automated tests (PHPUnit/Pest) and enforced code quality (Larastan, PHP-CS-Fixer), achieving 85%+ coverage and preventing regressions.
- Integrate LLM for features like claude, anthropic.

Web Developer, Esco, Philippines Inc.

2018 – July, 2023

- Developed and maintained responsive websites and internal web applications using a PHP/JavaScript stack with HTML5/CSS3 and relational databases.
 - Built reusable components and REST APIs; integrated third-party services to support e-commerce, CRM, and internal workflows.
 - Improved site performance with caching, asset optimization, and SQL tuning, reducing average page load times by ~30%.
 - Set up lightweight CI/CD pipelines for reliable deployments and rollback capability.
 - Collaborated with designers and stakeholders to clarify requirements, iterate on UX, and deliver features on schedule.
-

EDUCATION

Bachelor of Science in Computer Engineering (BSCpE)

- Graduated: June, 2016

PROJECTS

- Copyfy (<https://app.copyfy.io/>) - An AI-powered copywriting web app built to help businesses generate high-converting marketing content faster. The platform streamlines the creation of landing page copy, product descriptions, and ads while keeping brand voice consistent. Designed with a clean, conversion-focused interface and scalable SaaS architecture.
 - Skills & Tech: Next.js, React, Node.js, typescript API integrations, AI tools (Claude AI, ChatGPT), UX for SaaS, prompt structuring
 - Escolifesciences (<https://www.escolifesciences.com/>) - A professional life sciences website designed to clearly communicate research capabilities, services, and industry credibility. The project focused on structured content hierarchy, trust-building design, and responsive performance to make complex scientific information accessible and engaging.
 - Skills & Tech: HTML, CSS, JavaScript, Responsive Design, CMS integration, Performance optimization, Technical content structuring
 - EarthTech (<https://earthtech.app/>) - A modern technology-focused website built to showcase innovative environmental and engineering solutions. The site emphasizes clarity, strong visual storytelling, and a professional digital presence that supports business development and stakeholder engagement.
 - Skills & Tech: Next.js, Tailwind CSS, UI/UX Design, Component-based architecture, SEO fundamentals, Accessibility best practices
-

SKILLS

- Laravel / PHP
- React / Next.js
- TypeScript / JavaScript / Node.js
- PostgreSQL / Redis
- REST API Development
- Multi-tenant SaaS Architecture
- Stripe Subscription Billing
- RBAC & Authentication Systems
- Queues, Webhooks & Event-driven Workflows
- HTML / CSS / SCSS / Tailwind CSS / Bootstrap
- Responsive & Performance-focused UI Development
- CMS Development (WordPress, Shopify)
- Docker / GitHub Actions / CI/CD
- AI-assisted Development using Claude by Anthropic and ChatGPT
- Clean Code & Scalable System Design
